SUBJECT INDEX TO VOLUME XVII

ABBOTT treatment of rotary lateral curvature of the spine and details of the technique. Observations on the, 32
Adhesions, Sigmoid, 207; Postural treatment of post-operative abdominal, 755; The possibilities of preserving the integrity of potential body cavities by the use of a foreign body to prevent, 617
Adnexæ, Hernia of the uterus and both, with report of a case, 586
Air in the ventricles of the brain following a fracture of the skull, 237
Anæmia, The significance of, as an operative risk, 271
Anæsthesia, Intratracheal ether, 117
Anæsthetic, The selection of the, upon the basis of its ultimate physiology, 759
Anæsthetometer, An apparatus, for measuring and mixing anæsthetic and other vapors and gases, 245
Anastomosis, Intestinal, with a report on the aseptic basting stitch method, 496
Ankylosed joints, The mobilization of, an experimental study, 645
Appendicitis, The value of the röntgen method in the study of chronic, and inflammatory conditions, both congenital and acquired, about the cæcum and terminal ileum, 418
Appendix, Ileo-appendicular hernia of the, 191
Artificial delivery, Under what conditions should uterine inertia be treated by, 320
Ascites, Chronic, treatment and drainage by lymphangioplasty through a trocar wound under local anæsthesia; an experimental study, 523
Asphyxia neonatorum, Demonstration of the infant pulmotor with remarks on its use in the treatment of, 366
Atresia, Congenital, of the œsophagus; an operation designed for its cure, 397

BASTING stitch method, Intestinal anastomosis with a report on the aseptic, 496
Bladder through the operating cystoscope, The value of the D'Arsonval current in the treatment of benign and malignant tumors of the urinary, 636
Blood, Calcium content of the, during pregnancy, labor and puerperium, 304; pressure during pregnancy, 473
Body to prevent adhesions, The possibilities of preserving the integrity of potential body cavities by the use of a foreign, 617
Bone, Regeneration of, from periosteum, 164; Preliminary report on experimental, and periosteal transplantation, 681
Bones, Lengthening shortened, of the leg by operation, 63
Bowels, Two cases of obstruction of the, from unusual causes, 512
Brain, surgery, Compilation of the methods used and the results obtained by Fellows of the Chicago Surgical Society in, 357; Air in the ventricles of the, following a fracture of the skull, 237
Breast, The histogenesis of cancer (carcinoma) of the, and its clinical significance, 441
Broad ligament, Pericolic membrane of the, 60

CÆCUM and terminal ileum, The value of the röntgen method in the study of chronic appendicitis and inflammatory conditions, both congenital and acquired, about the, 418
Cæsarean section, The indications for abdominal, 198; The modern extraperitoneal, with a description of the best technique for its performance, 504
Calcium content of the blood during pregnancy, labor and puerperium, The, 304
Calculi, Bilateral urinary, 218
Cancer, What are the best methods of educating American women concerning, 610; Situation, A study of the, 490; of the œsophagus, The early diagnosis of, 693; The histogenesis of, (carcinoma) of the breast and its clinical significance, 441
Carcinoma, Infiltration of lingual nerve for operations upon the tongue and for relief of pain in inoperable, 114; Educational work in, of uterus, 720; Uterine, another hypothesis as to its cause and prevention, 328; of the uterus and vagina, A method of applying heat both to inhibit and destroy inoperable, 371
Catheter, A modification of Skene's retention, 255
Cavities, The possibilities of preserving the integrity of potential body, by the use of a foreign body to prevent adhesions, 617
Chicago, Gynecological Society, trans., 125, 264, 390, 516; Surgical Society, trans., 122, 256, 388, 514
Childbirth, Thrombosis and embolism following operations and, 603
Children, The dressing and care of herniotomy wounds of infants and small, 632
Cholecystectomy, 667
Cholecystostomy by oblique fistula, 232
Constipation, The X-ray investigation of habitual, 409
Continuous suction and its application in post-operative treatment, 115
Curvature, Lateral, 137; of the spine, The treatment of, 145
Cysts, Benign and malignant, 41; The abdominal incision in the treatment of ovarian, 576
Cystic disease of the parenchymatous organs, Pathogenesis of congenital, 480

D'ARSONVAL current, The value of the, in the treatment of benign and malignant tumors of the urinary bladder through the operating cystoscope, 636
Decompression in case of severe intracranial tension with failing circulation; an experimental study, 86
Drainage of the upper intestinal loop for the relief of ileus; based upon eight clinical cases successfully operated and animal experimentation, 674
Duodenal ulcer, Acute perforating gastric, 377
Duodenum, Intussusception of the stomach and, due to a gastric polypus, 184
Dysmenorrhœa, Infantile type of uterus with, 461; relieved by nasal treatment, Further report of cases of, 381

EDUCATING American women concerning cancer, What are the best methods of, 610
Embolism, Thrombosis and, following operations and childbirth, 603
Endocarditis, The conduct of gynecological and obstetrical operations in the presence of acute and chronic, 300
Enteroptotic woman, A description of the, 71
Epididymitis, The operative treatment of acute gonorrhœal, 749
Ether anæsthesia, Intratracheal, 117
Excluding the pylorus, A simple method of, 460

FALCIFORM ligament of the liver as plastic material available for use in the upper abdomen, The, 758
Fibroma molluscum gravidarum, The rôle of the glands of internal secretion in the genesis of, 402
Figure of 8 suture, Modified, 513
Fistula, Cholecystostomy by oblique, 232; The operative treatment of inaccessible vesico-vaginal, 368
Fluctuation, Three-finger, 109
Foot, Isolated disease of the scaphoid bone of the, in children (Koehler's disease), 628
Fracture, Intra-uterine, 346; of the lower end of the radius, Juxta-epiphyseal sprain and sprain, 241
Function, Renal, 696

GASTRIC, ulcer and its sequelæ, The X-ray in the diagnosis of, 1; and duodenal ulcer, Acute perforating, 377
Gastro-enterostomy by means of the X-ray, A study of the mechanism of the stomach after, 175
Gastrostomy suggestion, A, 236
Glands of internal secretion in the genesis of fibroma molluscum gravidarum, The rôle of the, 402
Graafian follicle, An ovarian pregnancy located in the, 698
Gynecology, Pathology the basis of, 308
Gynecological and obstetrical operations in the presence of acute and chronic endocarditis, The conduct of, 300

HÆMATURIA of the so-called essential type, An experimental study of unilateral, 93
Hæmoglobin of forty per cent or less, Operations on patients with a, 276
Hæmorrhage in thyroidectomy, A method of controlling, 642
Harelip, with illustrative cases, 500
Heart, The conduct of pregnancy and labor in acute and chronic affections of the, 294
Heat both to inhibit and destroy inoperable carcinoma of the uterus and vagina, A method of applying, 371
Hernia, Retrograde incarcerated, hernia "En W," 97; of the appendix, Ileo-appendicular, 191; of the uterus and both adnexæ; with report of a case, 586
Hernioplasty, A modification of the rectus fascial flap in inguinal, 763
Herniotomy wounds of infants and small children, The dressing and care of, 632
Hypernephroma, Malignant, of the kidney; its clinical course and diagnosis; with a description of the author's method of radical operative cure, 463
Hypophysis, Lesions of the, from the viewpoint of the surgeon, 724

ILEOCÆCAL valve, Surgery of the, a method of repairing an incompetent valve and a method of constructing an artificial ileocolic valve, 563
Ileosigmoidostomy, Ill effects from, report of a case, 510
Ileum, The value of the röntgen method in the study of chronic appendicitis and inflammatory conditions, both congenital and acquired, about the cæcum and terminal, 418; Acute invagination of the, secondary to sarcoma of the small intestine, 210
Ileus, Drainage of the upper intestinal loop for the relief of, based upon eight clinical cases successfully operated and animal experimentation, 674
Incontinence of urine, complete and incomplete, 533
Inertia, Uterine, its treatment, 385; Under what conditions should uterine, be treated by artificial delivery, 320
Infant pulmotor with remarks on its use in the treatment of asphyxia neonatorum, Demonstration of the, 366
Infantile type of uterus with dysmenorrhœa, 461
Infiltration of lingual nerve for operations upon the tongue and for relief of pain in inoperable carcinoma, 114
Inguinal hernioplasty, A modification of the rectus fascial flap in, 763
Insufflation tubes, The technique of insertion of intra-tracheal, 507
Internal secretion in the genesis of fibroma molluscum gravidarum, The rôle of the glands of, 402
Intestine, Acute invagination of the ileum secondary to sarcoma of the small, 210
Intestinal, anastomosis with a report on the aseptic basting stitch method, 496; Drainage of the upper, loop for the relief of ileus; based upon eight clinical cases successfully operated and animal experimentation, 674; stasis, The problem of, 737
Intracranial tension with failing circulation, an experimental study, Decompression in case of severe, 86
Intratracheal, ether anæsthesia, 117; insufflation tubes, The technique of insertion of, 507
Intra-uterine fracture, 346
Intussusception of the stomach and duodenum due to a gastric polypus, 184
Invagination of the ileum secondary to sarcoma of the small intestine, Acute, 210
Iodine in sterilization of the skin, 324

JOINTS, The end results of attempts to mobilize stiffened, 664; The mobilization of ankylosed; an experimental study, 645
Juxta-epiphyseal sprain and sprain fracture of the lower end of the radius, 241

KIDNEY, vessels found in fifty cadavers, Irregular, 580; Malignant hypernephroma of the, its clinical course and diagnosis; with a description of the author's method of radical operative cure, 463
Koehler's disease, Isolated disease of the scaphoid bone of the foot in children, 628

LABOR, and puerperium, The calcium content of the blood during pregnancy, 304; in acute and chronic affections of the heart, The conduct of pregnancy and, 294
Lactation, The influence of the thyroid glands on pregnancy and, 226
Laparotomy towel, A, 764
Lateral curvature, 137; of the spine, The treatment of, 145; of the spine and details of the technique, Observations on the Abbott treatment of rotary, 32
Leg, Lengthening shortened bones of the, by operation, 63
Ligament, The falciform, of the liver as plastic material available for use in the upper abdomen, 758
Lingual nerve, Infiltration of, for operations upon the tongue and for relief of pain in inoperable carcinoma, 114
Liver, The falciform ligament of the, as plastic material available for use in the upper abdomen, 758
Lymphangioplasty through a trocar wound under local anæsthesia; an experimental study, Chronic ascites; treatment and drainage by, 523

MASTOID operation; an operation of election, The protective, 753
Membrane, Pericolic, of the broad ligament, 60
Mobilization of ankylosed joints, an experimental study, The, 645
Mobilize stiffened joints, The end results of attempts to, 664
Mortality of suprapubic prostatectomy, Factors influencing the, 689

NASAL treatment, Further report of cases of dysmenorrhœa relieved by, 381
Nerve, Infiltration of lingual, for operations upon the tongue and relief of pain in inoperable carcinoma, 114

OBSTETRICAL, practice, Problems of, 25; operations in the presence of acute and chronic endocarditis, The conduct of gynecological and, 300
Obstruction of the bowels from unusual causes, Two cases of, 512
Œsophagus, Congenital atresia of the, An operation designed for its cure, 397; The early diagnosis of cancer of the, 693
Operations, on patients with a hæmoglobin of forty per cent or less, 276; in the presence of acute and chronic endocarditis, The conduct of gynecological and obstetrical, 300
Operative risk, The significance of anæmia as an, 271
Osteitis fibrosa cystica; report of a case, 536
Ovarian, Benign and malignant, cysts, 41; cysts, The abdominal incision in the treatment of, 576; pregnancy located in the Graafian follicle, An, 698

PANCREATITIS, Acute hæmorrhagic, peritoneal exudate non-toxic and even protective under experimental conditions, 541
Parenchymatous organs, Pathogenesis of congenital cystic disease of the, 480
Pathology the basis of gynecology, 308
Pelvic, floor, An operation for the cure of rectocele and restoration of the functions of the, 361; thrombosis of septic origin, The surgical treatment of, 147
Pemphigus, Report of interesting bacteriological findings in a case of, 85
Pericolic membrane of the broad ligament, 60
Perineorrhaphy, A self-retaining retractor for use in, 119
Periosteal transplantation, Preliminary report on experimental bone and, 681
Periosteum, Regeneration of bone from, 164
Pituitirin, A contribution to the study of, 103
Plastic material available for use in the upper abdomen, The falciform ligament of the liver as, 758
Polyps of the male urethra, A study of the benign, 548
Polypus, Intussusception of the stomach and duodenum due to a gastric, 184
Post-operative, abdominal adhesions, Postural treatment of, 755; treatment, Continuous suction and its application in, 115
Postural treatment of post-operative abdominal adhesions, 755
Pregnancy, Abdominal, with a living child, 58, 767; Factors in the formation of skin striations during, 335; labor and puerperium, The calcium content of the blood during, 304; and labor in acute and chronic affections of the heart, The conduct of, 294; and lactation, The influence of the thyroid glands on, 226; Blood pressure during, 473; located in the Graafian follicle, An ovarian, 698; in the rudimentary cornu of uterus unicornis, and report of a case with full-term fœtus, 427
Prostatectomy, 157; Factors influencing the mortality of suprapubic, 689; The post-operative complications of, 110; Suprapubic, 213; Eight drawings illustrating the steps of suprapubic, 630; Vital statistics of, 433
Proteids represented by the syncytial cell, A consideration of the reaction of the human organism to the class of foreign, 598
Puerperal thrombophlebitis, The management of, 316
Pulmotor, Demonstration of the infant, with remarks on its use in the treatment of asphyxia neonatorum, 366
Pyelitis follicularis, 612
Pylorus, A simple method of excluding the, 460

RADIUS, Juxta-epiphyseal sprain and sprain fracture of the lower end of the, 241
Rectocele and restoration of the functions of the pelvic floor, An operation for the cure of, 361
Rectus fascial flap in inguinal hernioplasty, A modification of the, 763
Regeneration of bone from periosteum, 164
Renal function, 696
Retractor for use in perineorrhaphy, A self-retaining, 119
Retrograde incarcerated hernia; hernia "En W," 97
Röntgen method in the study of chronic appendicitis and inflammatory conditions, both congenital and acquired, about the cæcum and terminal ileum, The value of, 418
Round ligaments, A modification of Webster's endoperitoneal shortening of the, 628
Rudimentary cornu of uterus unicornis, Pregnancy in, and report of a case with full-term fœtus, 427
Ruptured uterus, Review of the literature and case reports of, 51

SACRUM, Ventral tumors, of the, 340
Sarcoma, The malignancy of giant-celled, 30, 766; of the small intestine, Acute invagination of the ileum secondary to, 210
Scaphoid bone of the foot in children (Koehler's disease), Isolated disease of the, 628
Scissors, Ligature, 370
Sigmoid adhesion, 207
Skene's retention catheter, A modification of, 255
Skin, Iodine in sterilization of the, 324; striations during pregnancy, Factors in the formation of, 335; sutures, Applying, 765
Skull, Air in the ventricles of the brain, following a fracture of the, 237
Spine, The treatment of lateral curvature of the, 145; Observations on the Abbott treatment of rotary lateral curvature of the, and details of the technique, 32
Stasis, The problem of intestinal, 737
Sterilization, of the skin, Iodine in, 324; by means of extra-abdominal displacement, A method of ventrofixation combined with certain tubal, 120
Stomach, after gastro-enterostomy by means of the X-ray, A study of the mechanism of the, 175; Intussusception of the, and duodenum due to a gastric polypus, 184
Striations during pregnancy, Factors in the formation of, 335
Suction, Continuous, and its application in post-operative treatment, 115
Surgeon, How can the, in civil life best serve his country in time of war, 82
Suture, Modified figure of 8, 513; Applying skin, 765
Syncytial cell, A consideration of the reaction of the human organism to the class of foreign proteids represented by the, 598

TESTICLE retained within the abdominal cavity, Malignant disease of the, 703
Thrombophlebitis, The management of puerperal, 316
Thrombosis, and embolism following operations and childbirth, 603; of septic origin, The surgical treatment of pelvic, 147
Thyroid glands on pregnancy and lactation, The influence of the, 226
Thyroidectomy, A method of controlling hæmorrhage in, 642
Towel, A laparotomy, 764

Transactions, Chicago Gynecological Society, 125, 264, 390, 516; Chicago Surgical Society, 122, 256, 388, 514
Transplantation, Preliminary report on experimental bone and periosteal, 681; of tumors in animals with spontaneously developed tumors, 203
Tubal sterilization by means of extra-abdominal displacement, A method of ventrofixation combined with certain, 120
Tuberculin in the treatment of surgical tuberculosis; with clinical reports and late results, The use of, 437
Tuberculosis, The use of tuberculin in the treatment of surgical, with clinical reports and late results, 437
Tumors in animals with spontaneously developed tumors, Transplantation of, 203

ULCER, Acute perforating gastric and duodenal, 377; The X-ray in the diagnosis of gastric, and its sequelæ, 1
Urine, Incontinence of, complete and incomplete, 533
Urinary, bladder through the operating cystoscope, The value of the D'Arsonval current in the treatment of benign and malignant tumors of the, 636; calculi, Bilateral, 218
Urethra, A study of the benign polyps of the male, 548
Uterus, Educational work in carcinoma of, 720; Review of the literature and case reports of ruptured, 51; and vagina, A method of applying heat both to inhibit and destroy inoperable carcinoma of the, 371; Hernia of the, and both adnexæ, with report of a case, 586; Infantile type of, with dysmenorrhœa, 461; unicornis, and report of a case with full-term fœtus, Pregnancy in the rudimentary cornu of, 427
Uterine, carcinoma: another hypothesis as to its cause and prevention, 328; inertia — its treatment, 385; inertia be treated by artificial delivery, Under what conditions should, 320

VAGINA, A method of applying heat both to inhibit and destroy inoperable carcinoma of the uterus and, 371
Valve, Surgery of the ileocæcal, a method of repairing an incompetent valve and a method of constructing an artificial ileocolic valve, 563
Ventral tumors of the sacrum, 340
Ventricles of the brain, Air in the, following a fracture of the skull, 237
Ventrofixation combined with certain tubal sterilization by means of extra-abdominal displacement, A method of, 120
Vesico-vaginal fistulæ, The operative treatment of inaccessible, 368
Vessels found in fifty cadavers, Irregular kidney, 580

WAR, How can the surgeon in civil life best serve his country in time of, 82
Webster's endoperitoneal shortening of the round ligaments, A modification of, 628

X-RAY in the diagnosis of gastric ulcer and its sequelæ, The, 1; A study of the mechanism of the stomach after gastro-enterostomy by means of the, 175; investigation of habitual constipation, The, 409
